CONTENTS

INNOVATIVE. INTERACTIVE. FLEXIBLE.

nectar LMS

Nectar LMS stands for innovation, interactivity and flexibility. As a learning management system, it meets the latest technical standards and offers many additional features. Thanks to its clear user interface and usability, the web-based system enables efficient management of a wide range of learning media.

Courses, tests, face-to-face and online seminars can be managed centrally with nectar. Multimedia learning units can be easily integrated into modular curriculums to guarantee an in-depth and structured knowledge acquisition.

Integrated social Learning tools like chat and forum enhance the exchange of knowledge between the learners.

With nectar, you reach a large target group easily and effectively regardless of location. Whether desktop, laptop or mobile - nectar has a responsive design for all end devices. With nectar, digital learning is made easy!

AT A GLANCE

Variety of learning units:

WBT (SCORM files), tests, documents, freely designable learning pages

Blended Learning:

Integrated seminar management with meeting calendar

Gamification:

Points system, skill acquisition with levels, likes

Languages:

German, English, French (and more)

Curriculums:

Integration of learning units into modular learning paths

Skills management:

Building on existing knowledge

Wide test function:

Different question types, question pools, anonymisation

Security:

GDPR-compliant with server location Germany

Easy administration:

Automated user and group administration (optionally via single sign-on)

Social Learning:

Forum, chat and comment function

Reporting:

Full statistics and report function with export feature

Help Desk:

Support team for all topics

BASIC APPLICATION FEATURES

The function and design of the LMS facilitate individual customisation and adaption to meet customer requirements.

Customisation

- Customer domain
- Customer branding
- Choice of two layouts
- Modules can be shown/hidden
- Configurable user properties
- Responsive design
- Personalised login page

Multiple languages

- Interface in German, English, French (and other languages)
- Multilingual courses, curriculums and tests

Multi-client capability

- Separate administration for users and content within a client
- Individual adaptation of clients via the administration area
- Cross-client learning units & evaluation

User registration

- User import via CSV file or single sign-on (optional)
- Self-registration (optional)
- Password reset button

Role management

- Access rights via roles (administrator, learner, tutor, organizer, instructor)
- Individual role configuration

Daten Adressen Lernhistorie Kompetenzen

Mandanten: FKC MUC Hinzufügen

Support

- By telephone and e-mail
- Personal contact

ADMINISTRATION

The user-friendly administrator interface in the nectar LMS enables efficient management of your learning units.

Administrator interface

- User-friendly, clear interface
- Administration interface integrated in the LMS

Features for learning units

- Cross-client courses, tests and seminars
- Preview for tests & courses
- Grouping of learning units into modular curriculums (free or sequential editing)
- Topic assignment for courses, tests, seminars and curriculums
- Adding documents to learning units
- Setting points for completion of learning units
- Setting the expected learning duration
- Copying courses (also across clients)

Group administration

- Automated assignment to learning units through group structure
- Manual or automatic assignment of groups based on individual conditions

Seminar management

- Management of face-to-face and online seminars in the LMS
- Integrated appointment calendar
- Series meetings
- Instructor and organiser role
- Visibility control of meetings for learners
- Status option for meetings
- Documents for meetings with time-based visibility configuration

ADMINISTRATION

The extensive test function offers numerous question types for interactive knowledge assessment and surveys.

Test environment

- Create and manage test modules in the LMS
- Variety of question types: Single choice, multiple choice, drag & drop, sorting, cloze (gaptext), open question (with or without scoring)
- Dynamic control of question compositions via question pools
- Question pools with competence attribution option
- Weighting of questions by importance
- Time limits for questions (optional)

KNOWLEDGE TRANSFER & REGULATION

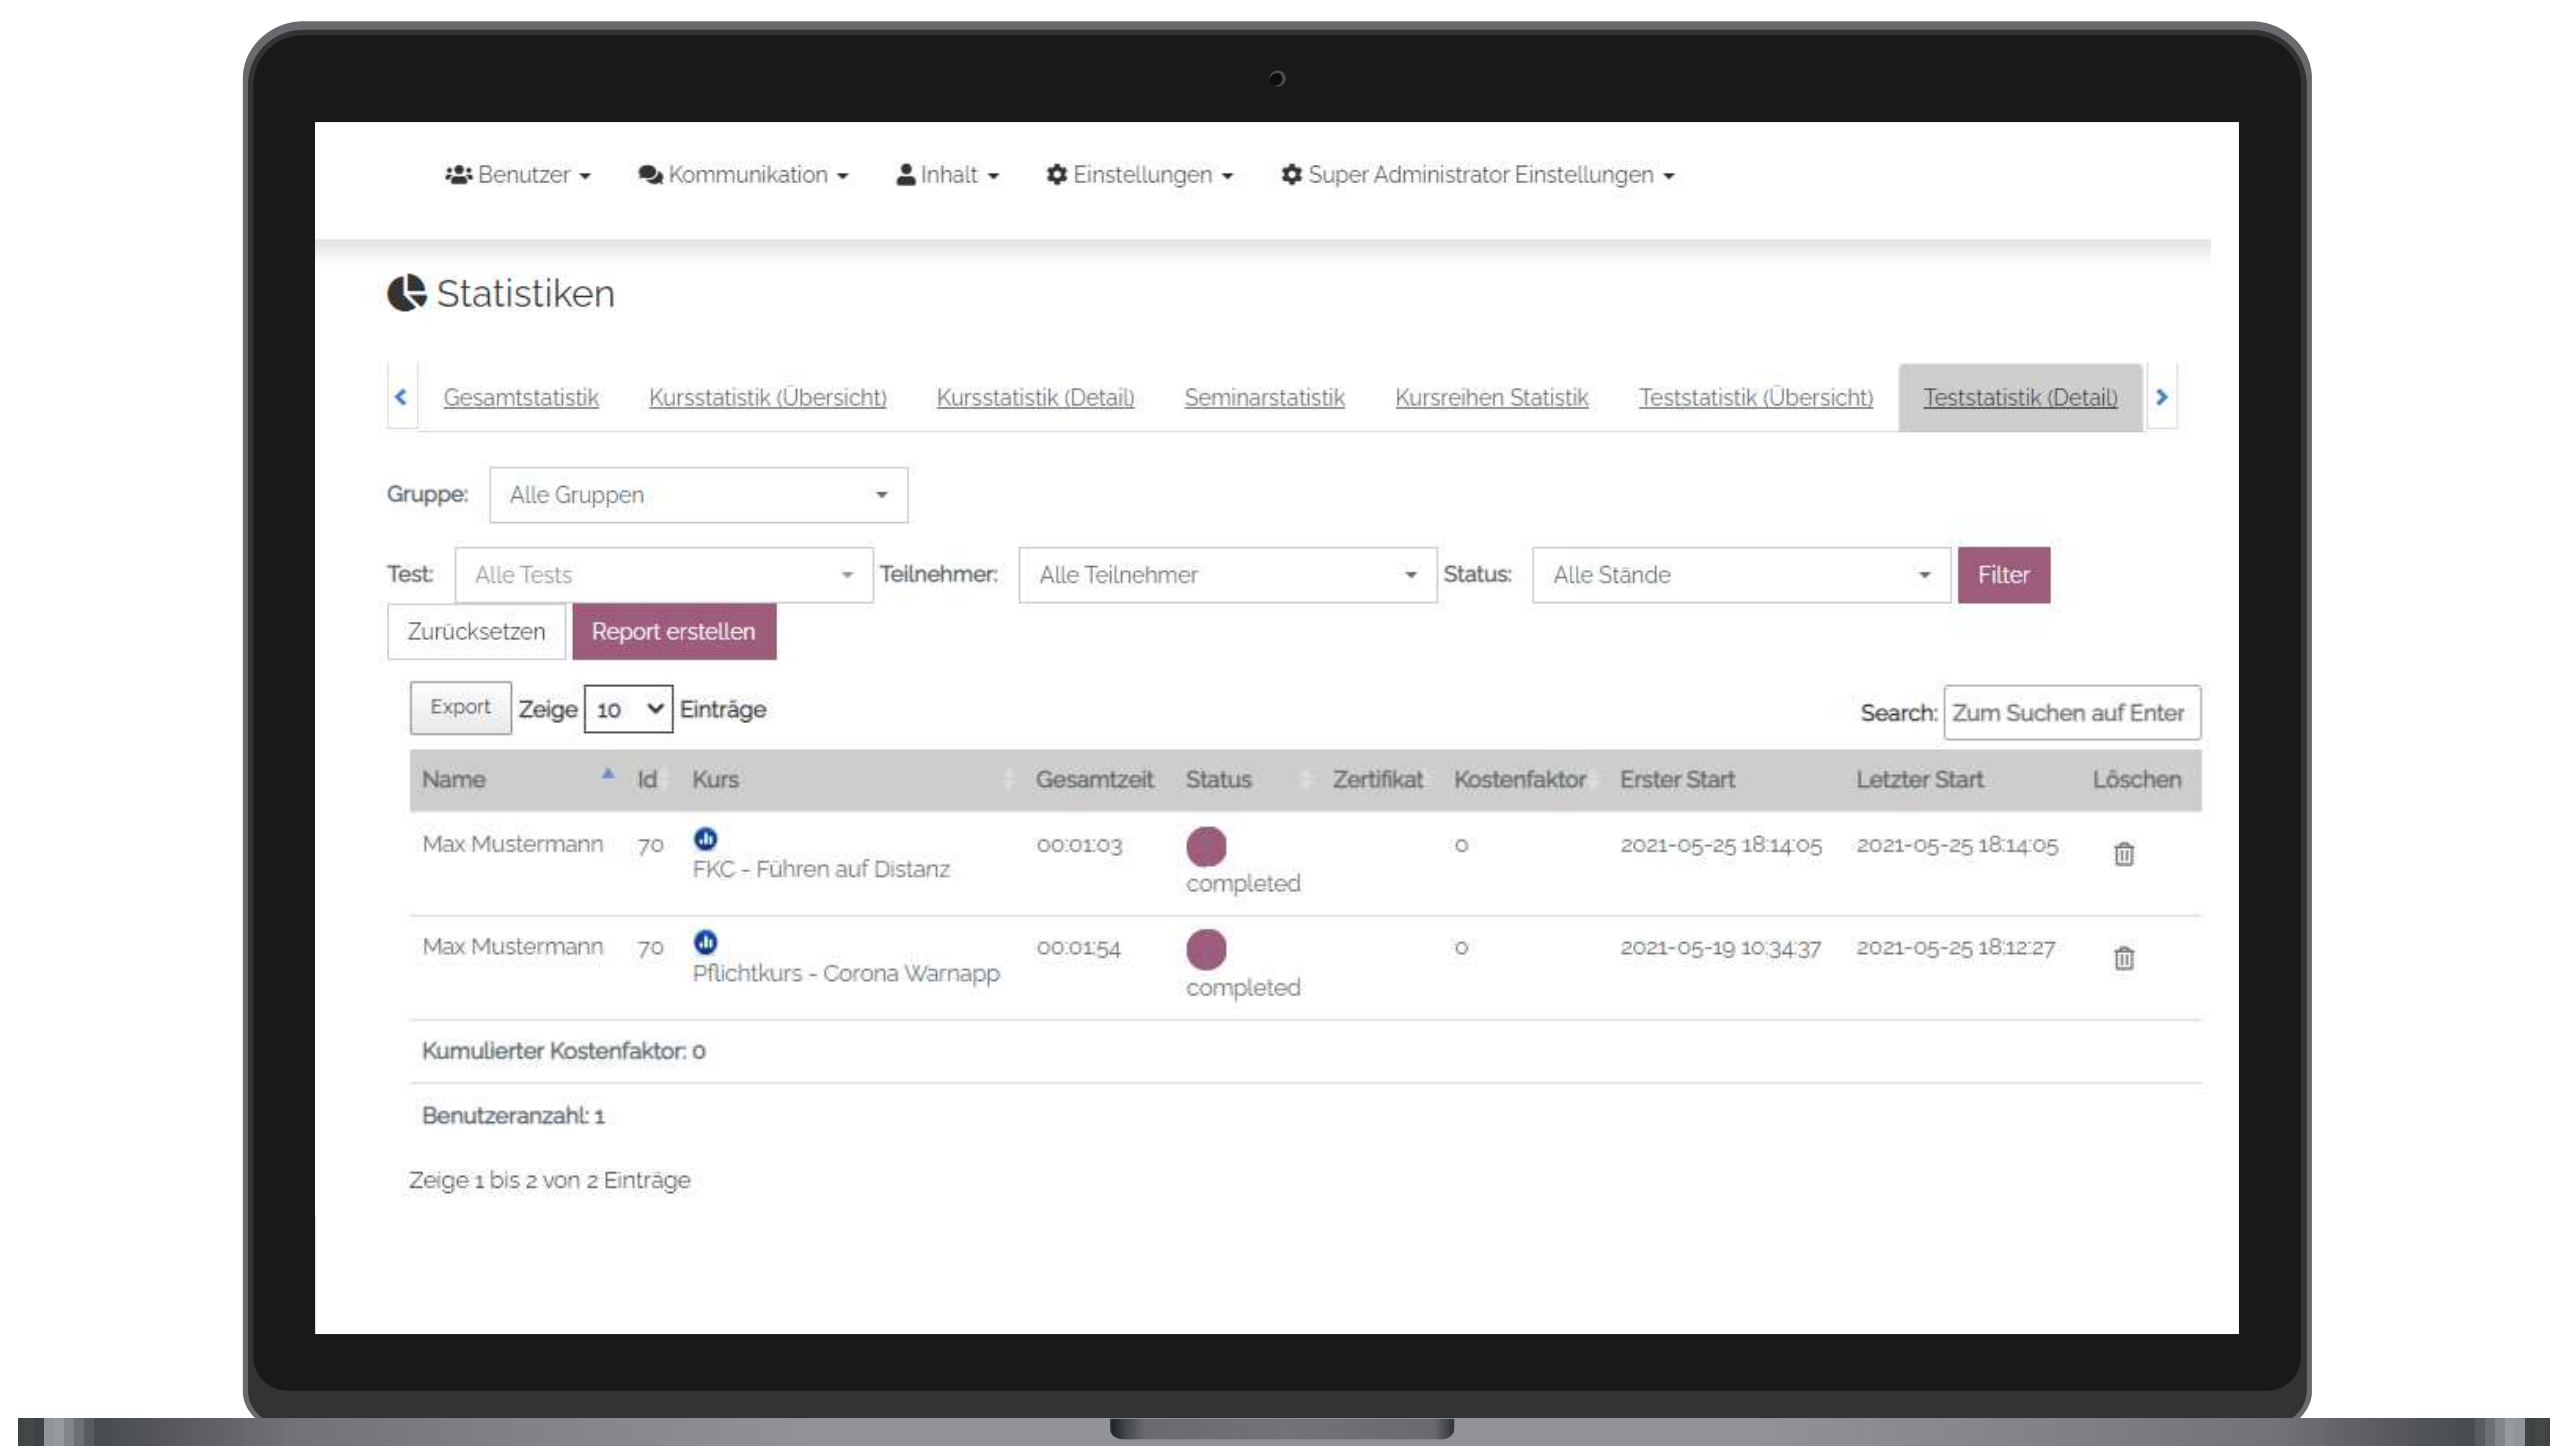

The broad statistical evaluation and the certificate function with adaptable validity period make learning results perfectly measurable.

Approval workflow

- Setting mandatory units & escalation levels (with email notification)
- Approval of learning unit access by a supervisor (optional)

Reporting

- Statistical evaluation of progression statuses of all learning units
- Statistical evaluation of user activities
- Export of evaluations (Excel)
- Creation of reports

Certificate management

- Creation of certificates (with editable fields)
- Certificate feature for the completion of learning units
- Upload function for external certificates
- Certificates for downloading in the LMS or sending by e-mail
- Validity cycle with reminder function via email

COMMUNICATION

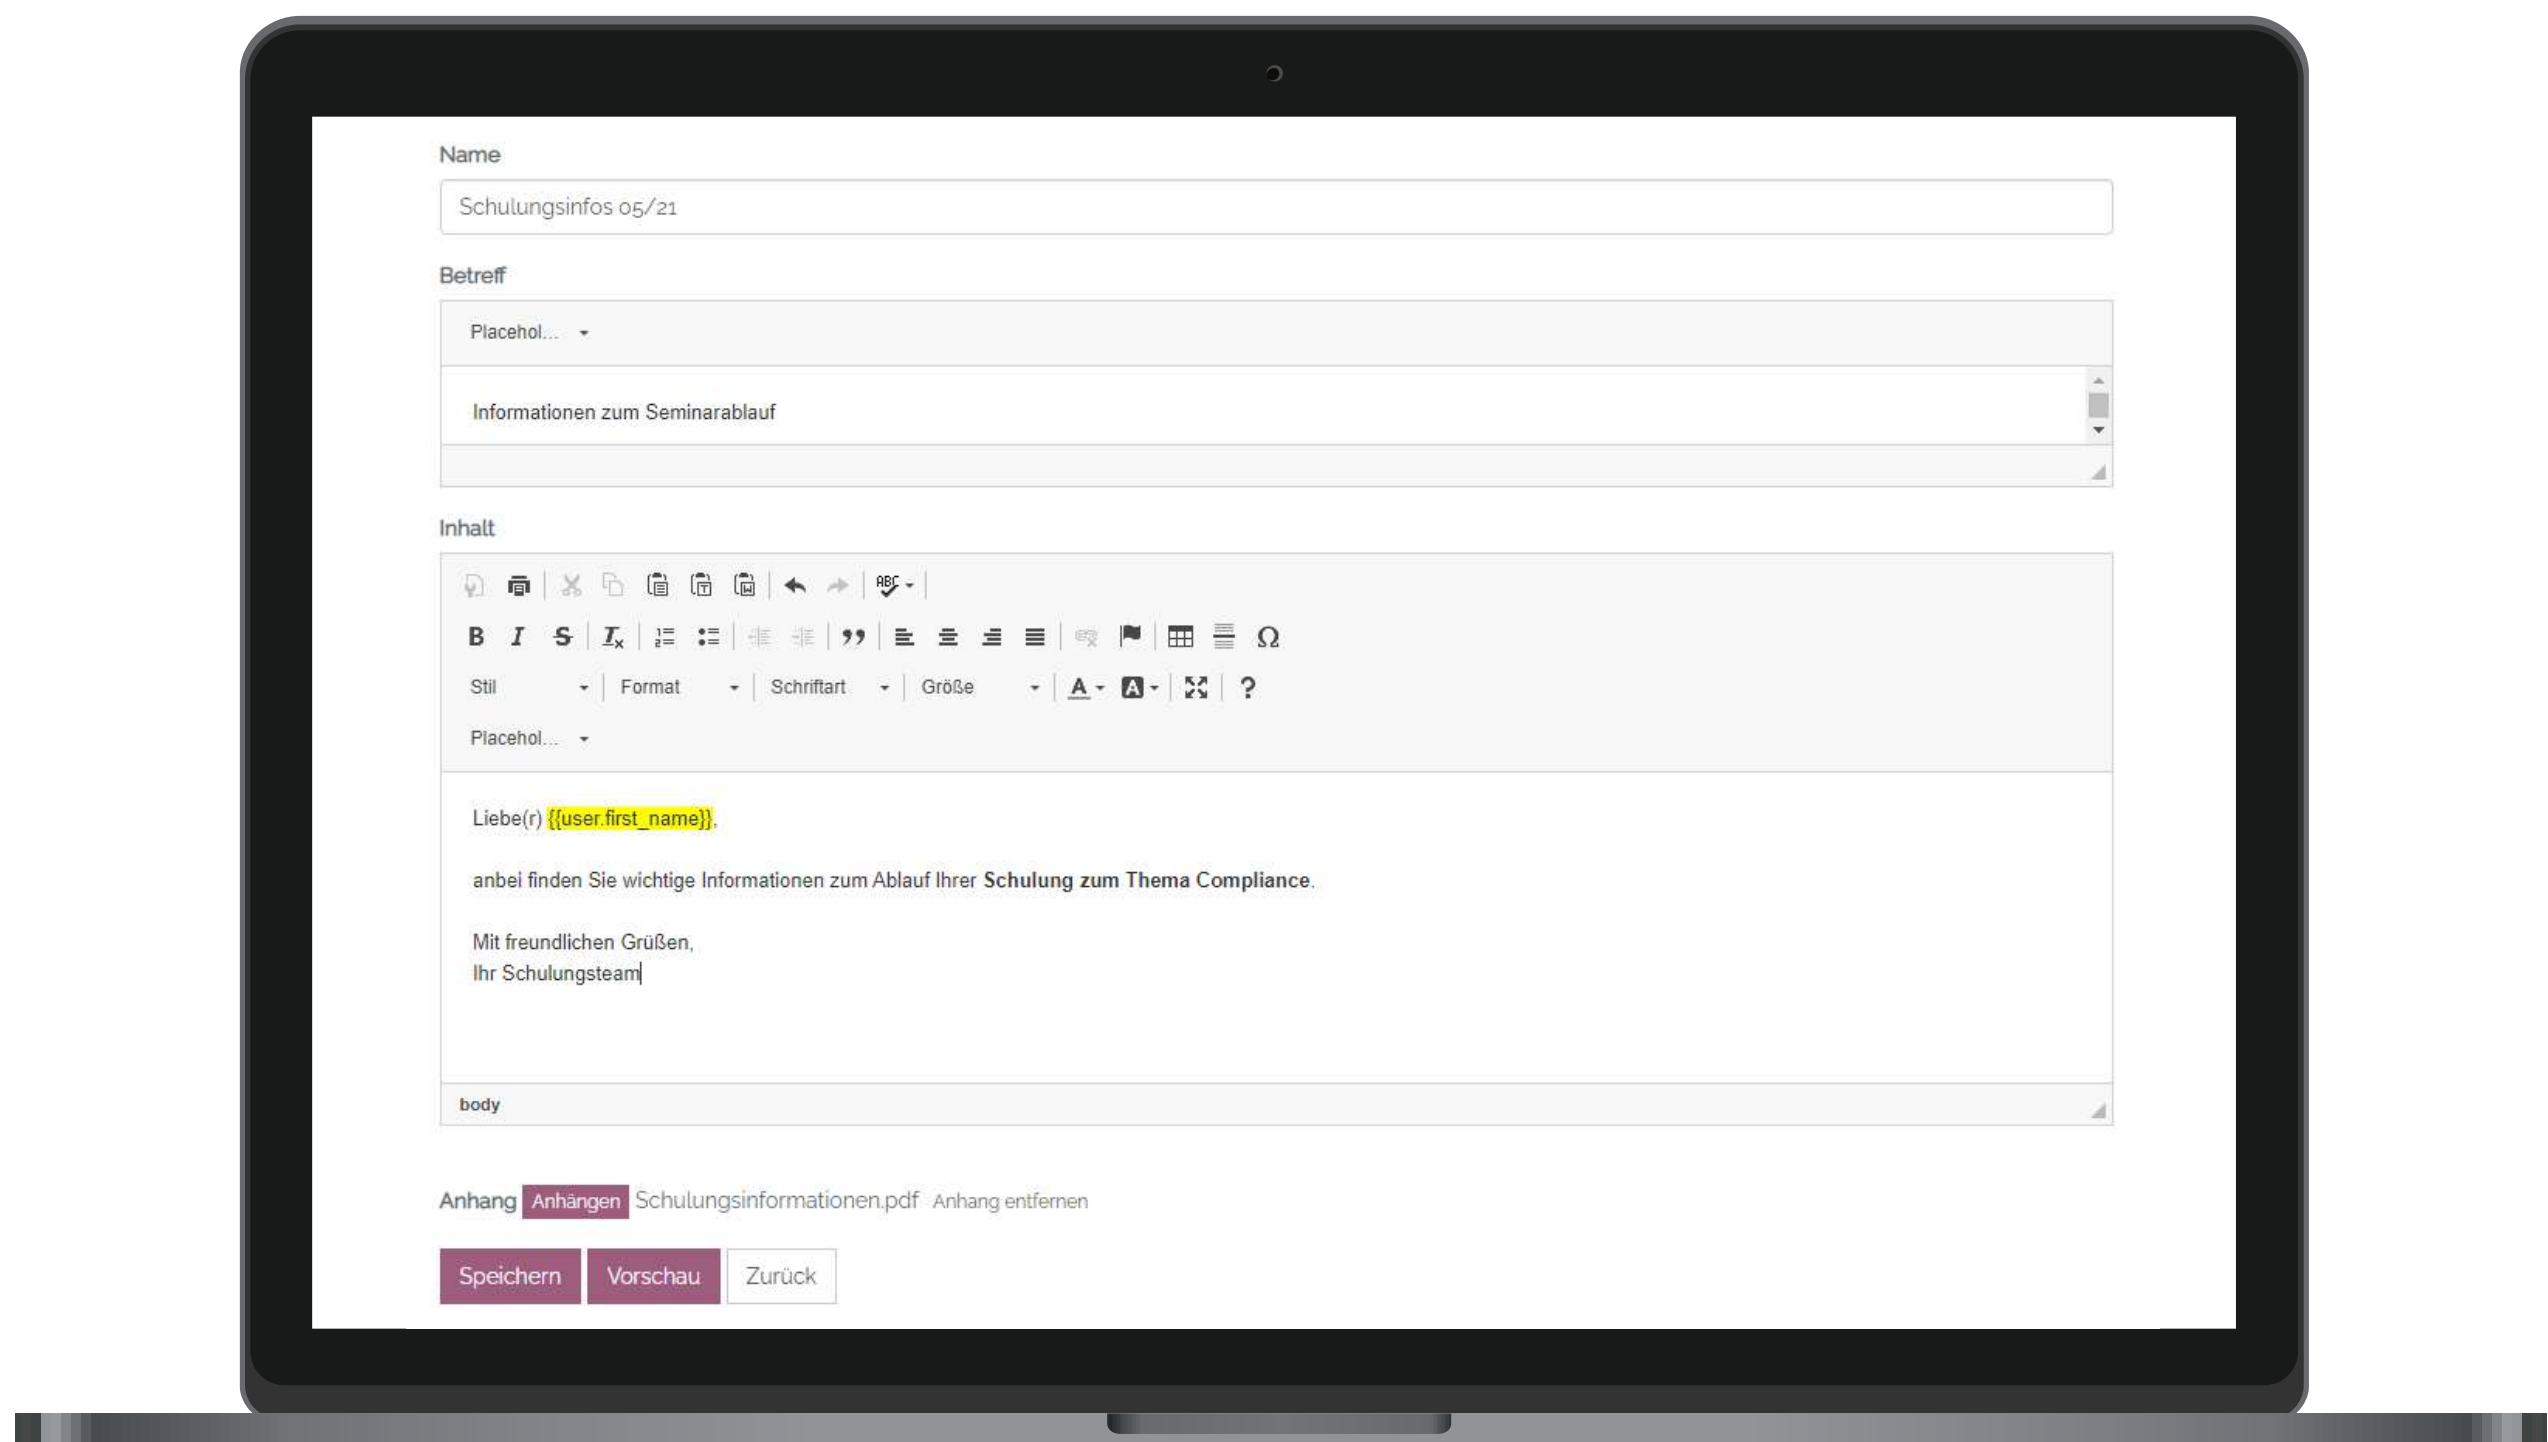

Further functions for interactive knowledge acquisition complement the nectar LMS.

Knowledge management

- FAQ section: Frequently asked questions and their answers (with integrated search)
- Glossary (with integrated search)
- News section: For sharing recent information
- Library for uploading documents, images and videos
- Document management for individual learning units / groups

Email notifications

- Customisable email templates
- Automated registration messages
- Automated messages for compulsory courses (invitation, reminder, etc.)
- Automated dispatch of seminar reminders (with iCal object)
- Dispatch of (personalised) bulk mail to groups (with editable fields)

LEARNING UNITS

Nectar supports a variety of media as well as the creation of certain content directly in the LMS.

Upload of learning units

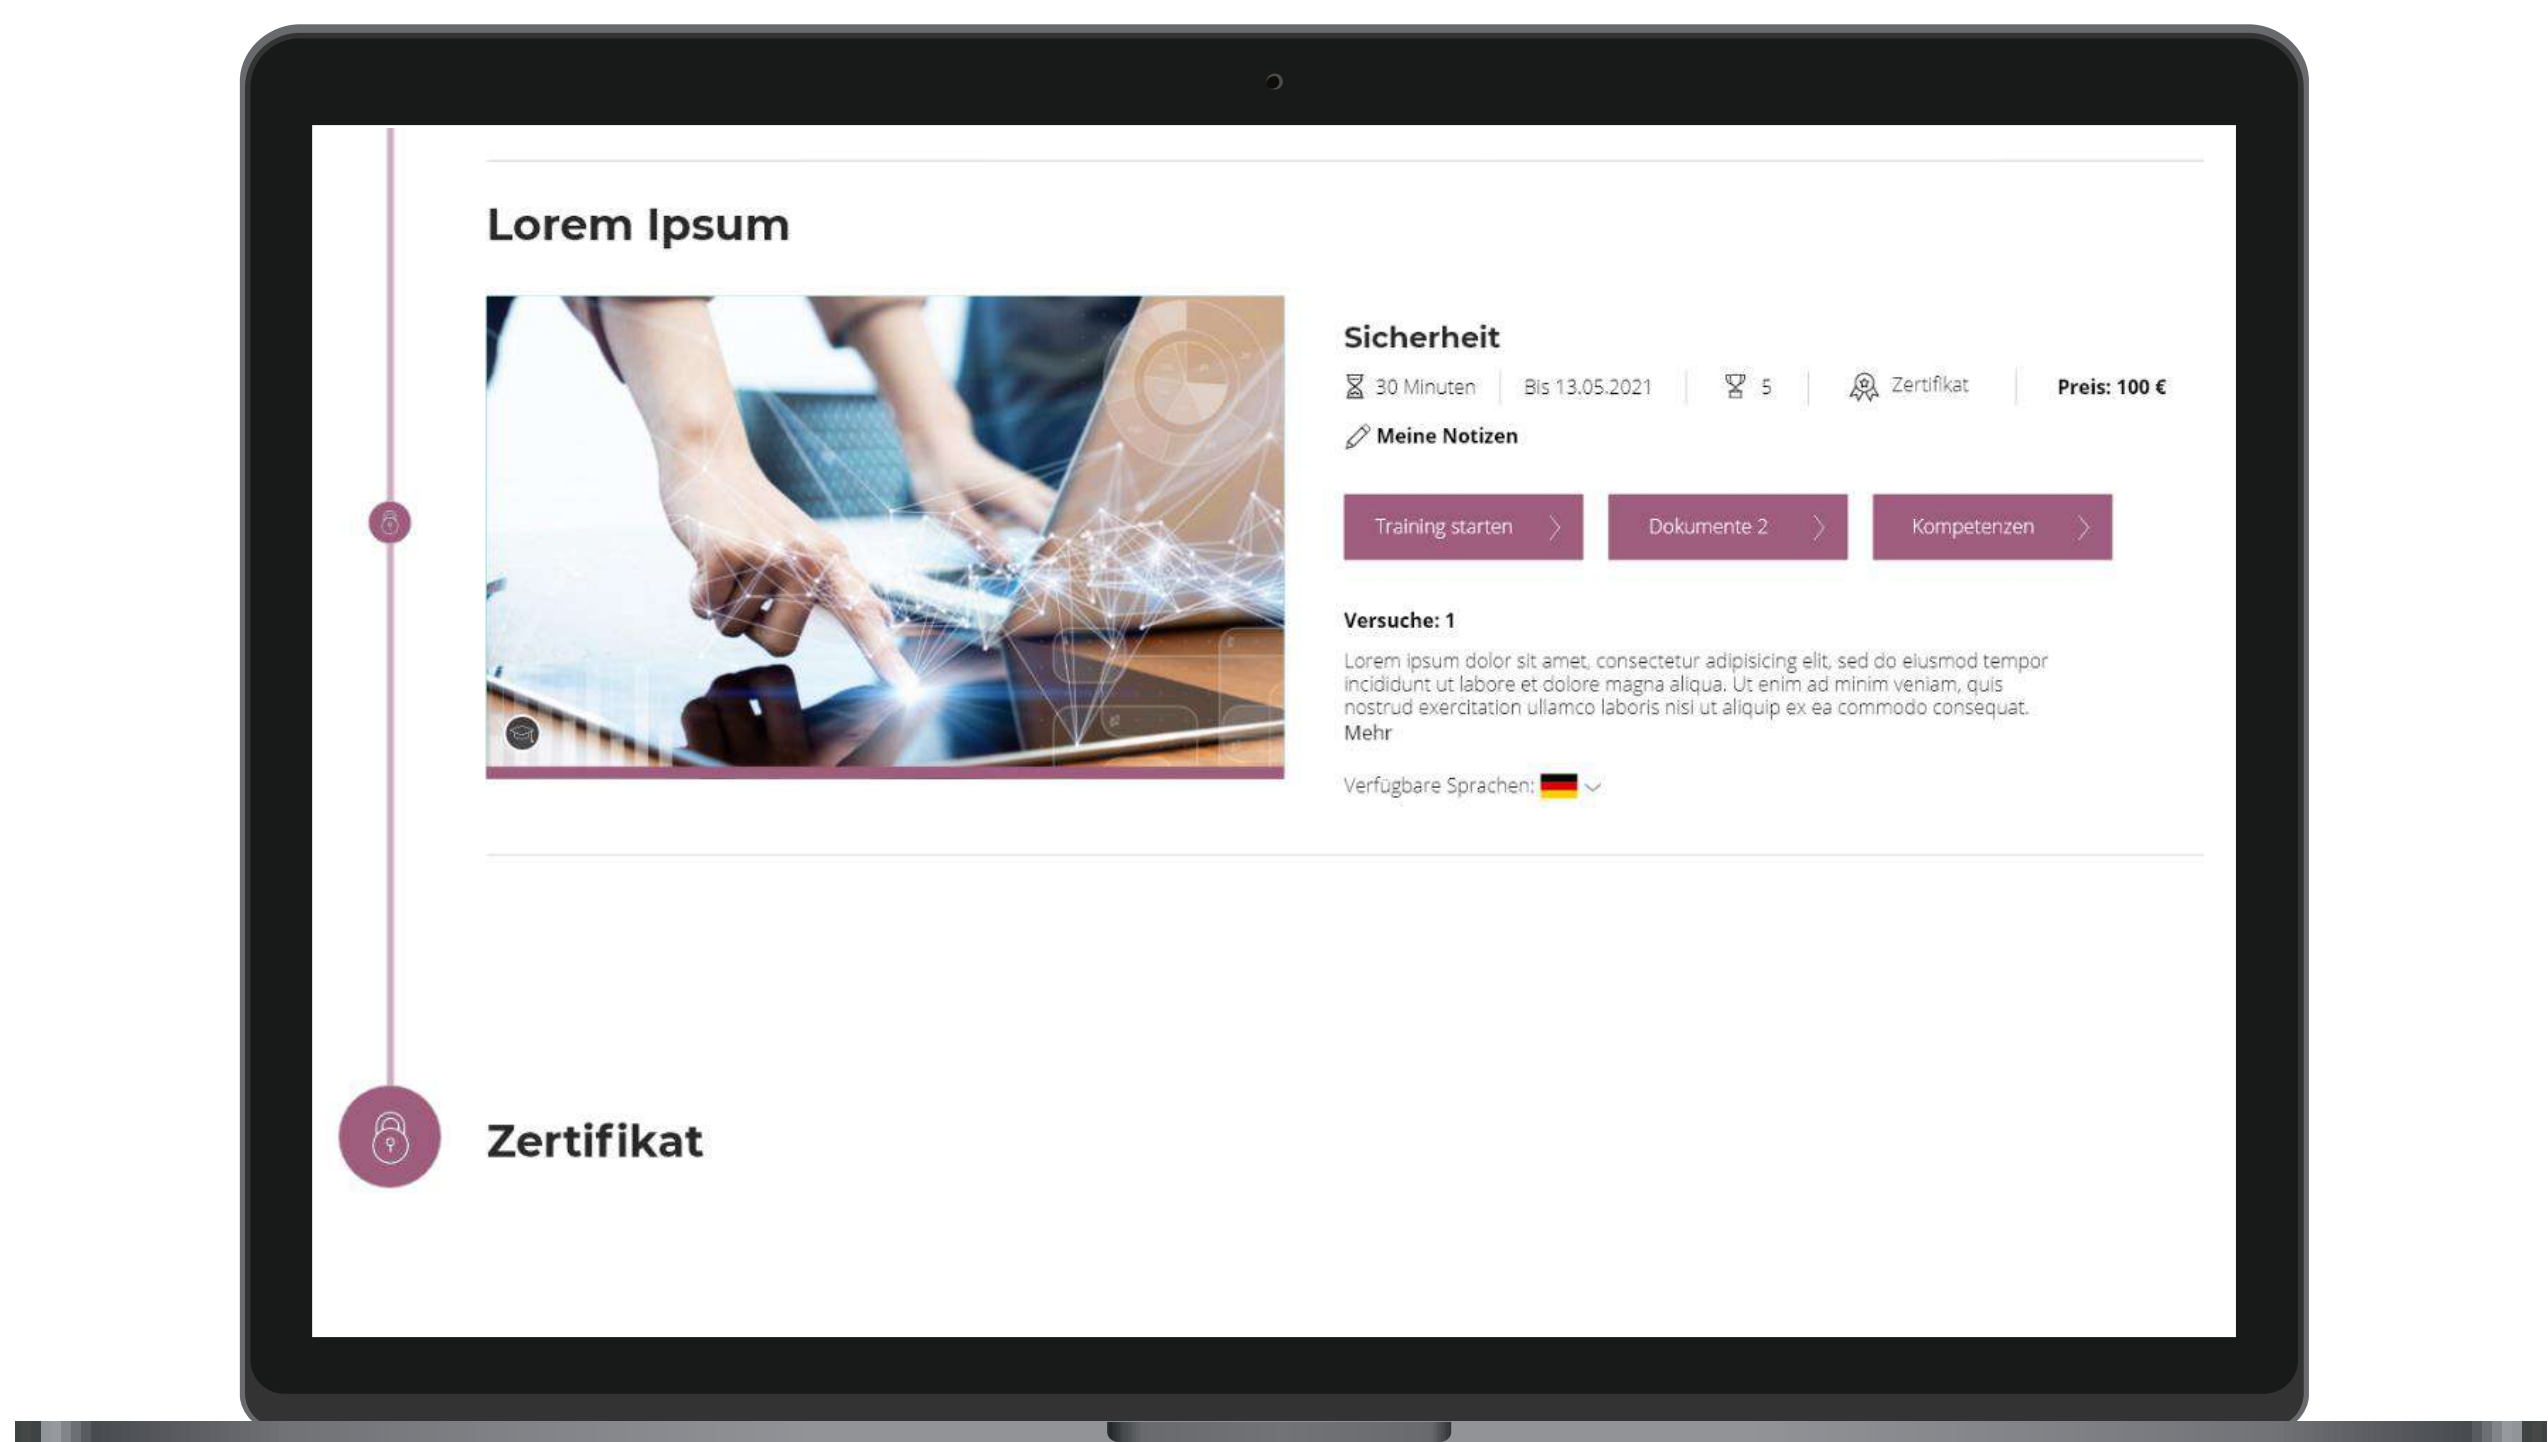

- Integration of Web Based Trainings (WBT) in SCORM format (SCORM 1.2 & 2004)
- Video and podcast player with saving of processing status

Authoring functions

- Creation of test modules in the LMS
- Creation and management of seminars
- Creation of learning pages: Designable directly in the LMS with text, images, documents & videos

Further features

- All learning units (curriculums, courses, seminars, tests) at a glance, with filters of completion status and topic
- Evaluation of all course units according to numerous criteria
- Possibility for the administrator to manually set courses as completed
- Addition of documents and comments on courses and seminars by administrators, tutors and learners
- Integration of learning units into modular curriculums, with the option of setting a learning path

GAMIFICATION

Gamification elements increase motivation and encourage self-determined learning in the nectar LMS in a playful way.

Motivating points system

- Points system for completion of learning units
- Points can be set individually for each learning unit

With each successfully completed learning unit, users gain points in the nectar LMS. Managers thus have the option of giving individual courses a higher weighting, as well as rewarding special achievements.

Explorative interface

The optional integration of a graphical interface with clickable elements and further gamification elements into the LMS offers an even more interactive learning experience.

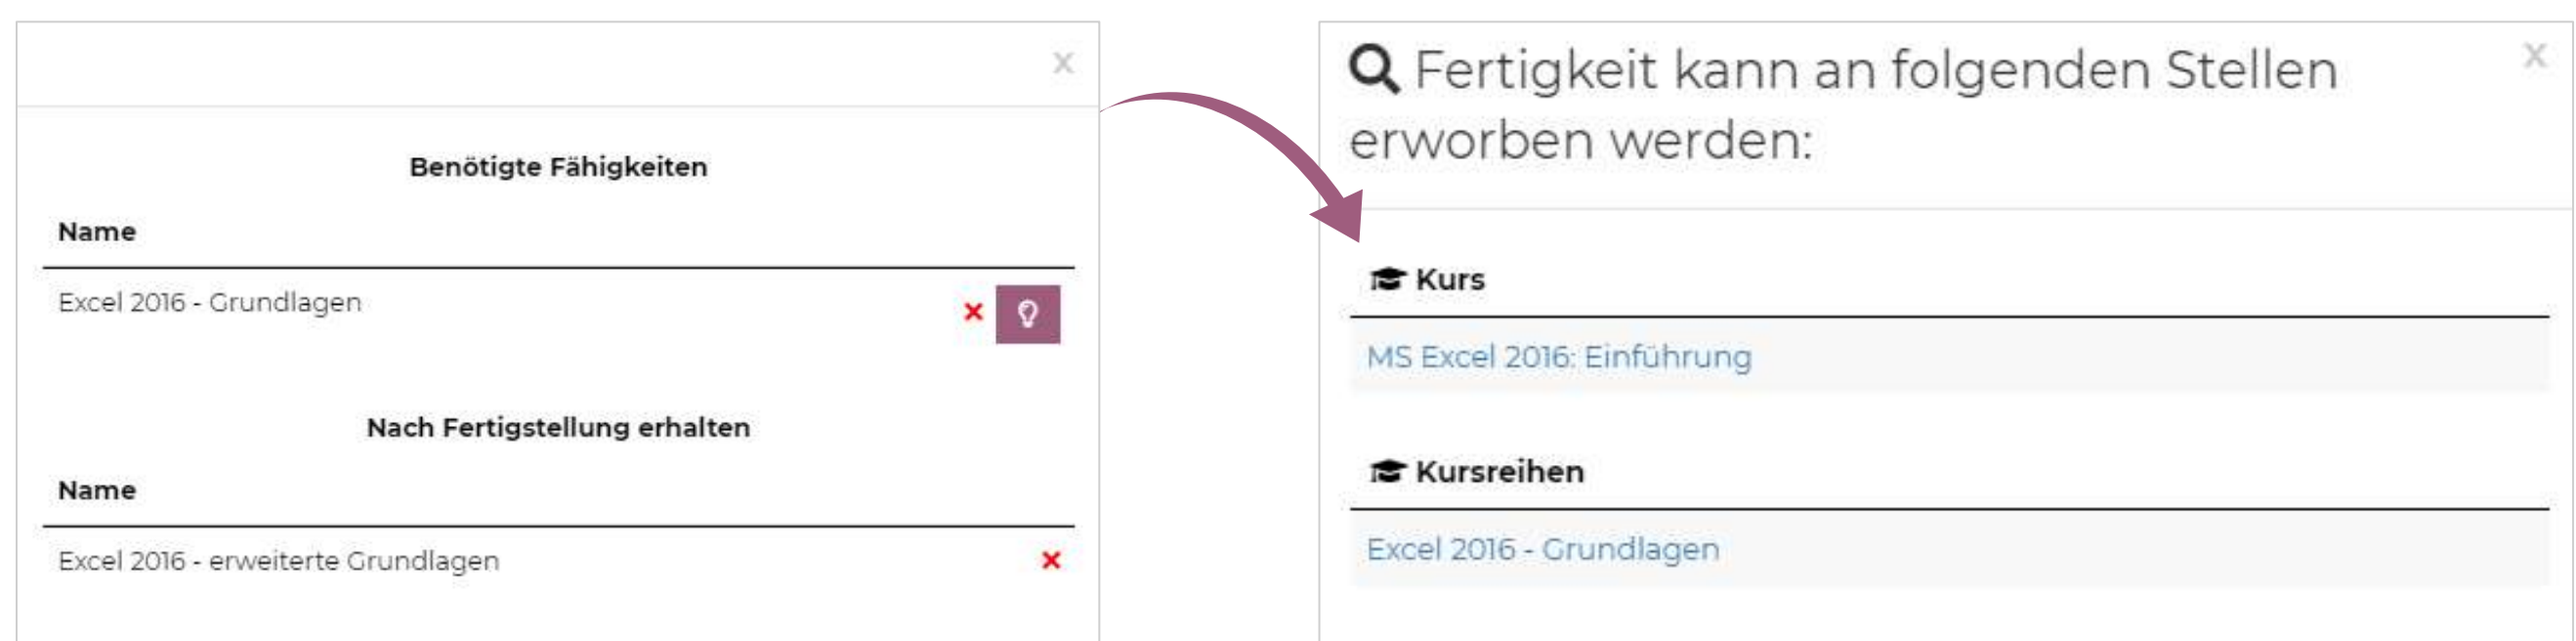

Example: Miele 3D learning world

GAMIFICATION

Taking existing knowledge into consideration promotes explorative learning.

Skill management (with levels)

- Acquisition of skills (with individualised levels)
- Skills and levels can be individually defined
- Consideration & development of existing knowledge
- Course recommendations

Achieving levels is a key feature of game-based learning and provides additional motivation. In the nectar LMS, learners expand their skills by completing courses to unlock the next level for a competency.

The desired skills are created by the administrator directly in the nectar LMS and linked to learning units. The acquired competences of the learners are visible and can be used, for example, for HR development.

Interaction with other learners

- Live chat with other learners
- Exchange in the forum
- Comment function for learning units
- Granting likes for learning units

For learners, interacting with other learners can be a powerful motivator - be it through challenges or sharing ideas and learning content. The nectar LMS offers several social learning features.

TECHNICAL DETAILS

The nectar LMS meets the latest technical standards and is constantly being further developed further.

Overview

- Software-as-a-Service (SaaS) / Infrastructure-as-a-Service (IaaS) licensing model
- FKC hosting or self-hosting
- Development based on the Laravel PHP Framework
- Code not older than 3 years
- API interfaces / Single-Sign-On (optional)
- iCal integration

FKC Hosting

- Hosting location in Germany
- Hosting provider ISO 27001 certified
- Daily file and database backups

Data security

- GDPR-compliant
- Anonymisation and AES encryption of personal data in the database
- Access to personal data in the LMS only with the corresponding authorisation level
- Secure data transmission via TLS encryption

System requirements (for self-hosting)

- Linux, Apache 2+, Mysql 5.6+ / Mariadb 10.2+, PHP 7+ (LAMP)
- 10+ GB Free Memory, 6+ GB RAM

COST PLAN

We will be happy to provide you with an offer individually tailored to meet your requirements.

Service	Quantity	Amount
1. Nectar LMS Licence & usage fee for registered, active users Minimum term: 3 years Includes updates, technical support (4 h/month; additional hours: 150 €/h)	Number of users - see table below	Price €/year according to table below
2. Implementation nectar LMS • Initial implementation incl. set-up fee on server • Basic adaptation of graphics to corporate identity (1 frontend) • System standard including interface languages German & English • 1 day (4 - 6 h) Workshop: Administrator training • 12 h support for administrators		9.800,00 EUR / One-time
3. Hosting (server in Germany, data backup, monitoring, security updates) up to 10.000 registered users		7.200,00 EUR / Year
4. User support (80€/h)	On demand	

User	Discount (%)	Base price	Amount
500	0	15,00 €	7.500,00 €
1.000	30	10,50 €	10.500,00 €
